About us

PULSAR is company established in 1994. Its main profile is production of equipment and accessories for alarm, access control and CCTV systems. Currently, our production halls, warehouse and others plant departments cover 5000m².

Our company employs more than 230 people with high professional qualifications, working in each of following departments: production, construction and technological, marketing and administration. These allow us to ensure constant high quality of products and provided services.

Today, PULSAR is Polish leader in its sector, and has many clients in Europe, Middle East, USA and Africa.

Company position in market is result of high quality and reliability of our products, experience and excellent customer service.

Company policy ensures continuous increase in sales and expansion into new markets.

Company has been gradually extending training range and actively participates in fairs and trade events (e.g. SECUREX, IFSEC, ENERGETAB, ROMANIAN SECURITY FAIR, SICUREZZA, INTERSEC, NEW SECURITY, SAFETY EXPO, AUTOMATICON, SECURITY EXPO, INDELEX, SECTECH, SICUR, MIPS, SECUREXPO, EXPOPOWER), due to contacts with our customers and buyers.

Products

PULSAR has been continuously extending its product range. New designs are result of thorough analysis of market needs and consultations with business partners. New products are being developed by our qualified Design Department engineering staff, who takes into account distributors' and fitters' comments and opinions in their designs. Current product mix of our company includes:

Metal enclosures

- for I&HAS alarm systems
- for monitoring systems
- for ACC access control KD
- for CCTV

Power supply units for IP cameras

- PoE - buffer
- PoE

Metal enclosures with DIN rail

- with DIN rails
- with DIN rails / RACK profiles

Power supply units for HD cameras

- multi-output
- buffer
- PoE 27,6V
- hermetic
- 24VAC

Teletechnical enclosures

- universal for households
- universal with plywood

PoE switches

- in metal enclosure
- buffer
- for DIN rails
- in RACK 19" enclosure

RACK 19" cabinets and accessories

- wall mounted cabinets
- floor standing cabinets
- power supply units
- PoE switches
- enclosures
- others

Modules

- buffer power supplies
- DC/DC voltage converters
- voltage reducers,
- fuse modules
- protection modules
- time modules

Buffer power supply units

- universal - 13,8/27,6/54VDC
- compliant with EN50131-6 standard for alarm systems
- in accordance with EN54-4 standard for fire detection
- accessories
- batteries

AC/AC transformers

- TRP series - IP30
- TRZ series - IP43
- TOR series
- EI series

We are direct importer of Mean Well
Product offer is available at www.pulsar.pl/meanwell

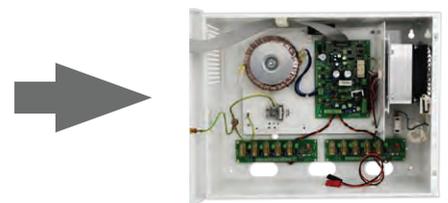

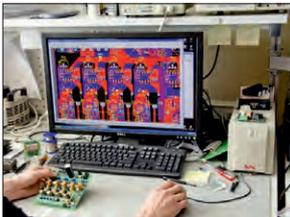

Available on request (OEM / ODM)

Our company engage in on and comprehensively implements individual designs of metal enclosures and power supply units according to needs, specifications and designs submitted by our clients. Purpose for carrying out individual designs is to ensure client's maximum satisfaction. Therefore, rule we have approved as basis of our activity is to meet our clients' requirements so that they are fully satisfied with product and contact with our company.

Design Department

Construction and Technological Department of our company is responsible for issues of product designs, selection and quality of employed materials, production technology for accessories, and preparing individual designs. We own suitable tooling and developed machinery stock, which allows us to implement both our own and external designs.

Quality - ISO 9001

In concern for product quality, our production process is based exclusively on highest quality components supplied by reliable distributors. Devices are subjected to repeated checks during each production stage. Having in mind legal and functional aspects, equipment is put through LVD and EMC tests in accredited research laboratories.

This is proven by valid CE certificates and certificates confirming equipment compliance with EN 50131 standard for alarm systems issued for selected products. High functional and technical quality is proven by our clients' opinions. Having obtained quality management system certificate ISO 9001, our company guarantees proper quality policy.

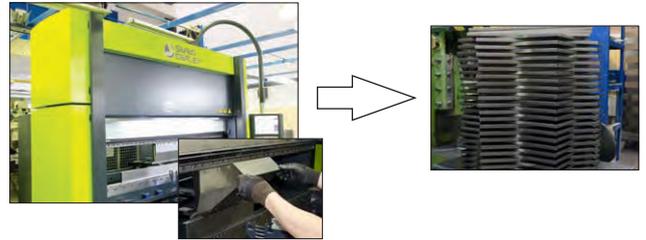

Machinery stock

PULSAR has been continuously modernising its machinery stock in order to improve quality of products, extend product mix and services, and reduce production costs. Currently, we have following machines and facilities:

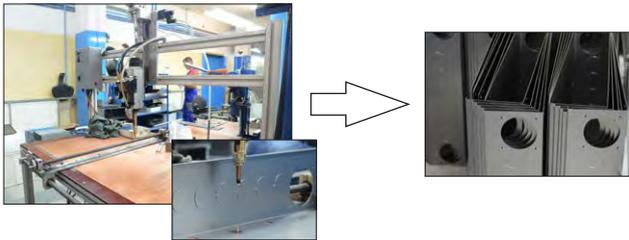

FINN-POWER numerical cutters

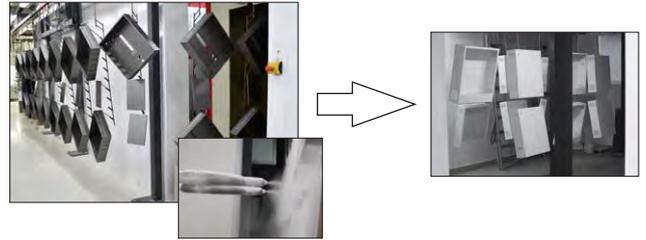

Press brakes, eccentric

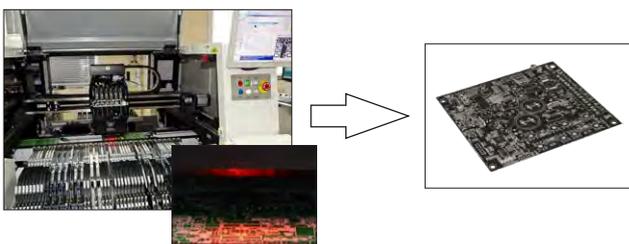

Welding machines

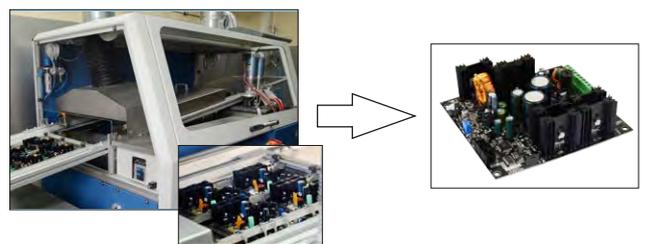

Powder coating line

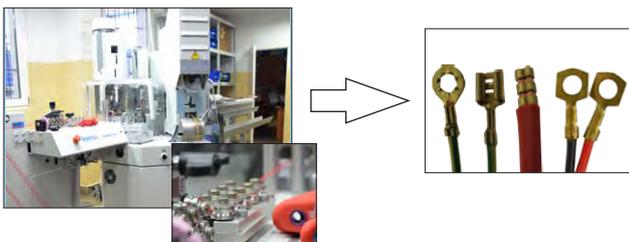

SMD (Surface Mounted Devices) assembly stations

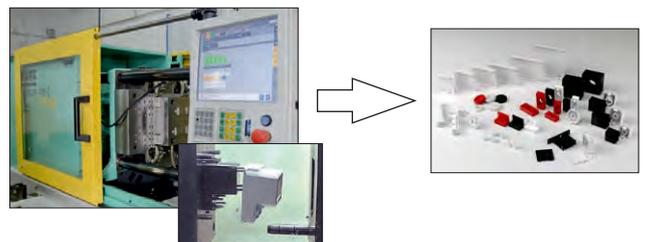

Wave soldering machine

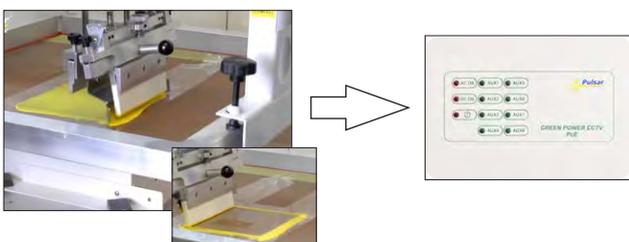

Wire processing machine

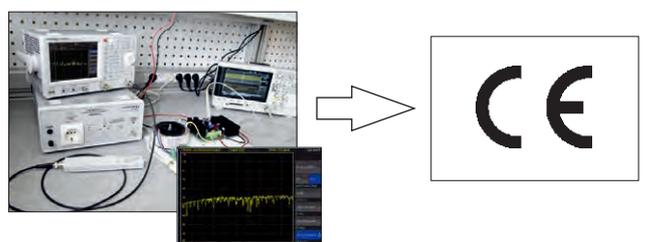

Injection moulding machines

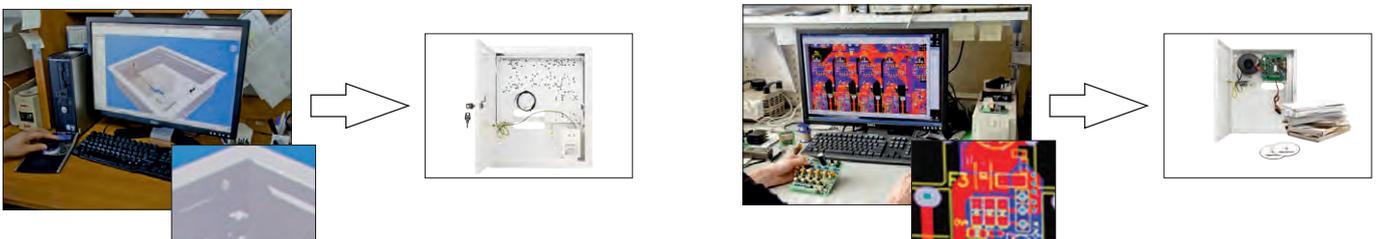

Screen printing

PowerSecurity is a program allowing a remote monitoring of power supply units of PSBEN or EN54 series equipped with a communication interface. Application allows to configure connections, analyze current parameters and to manage groups of power supply units.

Power supply units of PSBEN series

For power supply units of PSBEN series, remote desktop window allows monitoring following parameters:

- voltage and current at AUX output of power supply units
- 230V mains supply status
- voltage and battery charging level (optional remote battery test)
- status of technical outputs (EPS, PSU, APS)
- status of input of collective failure - EXTi

Additionally, it is possible to read history of events and in case of power supply units fitted with LCD display to read, history of parameters.

Power supply units of EN54 series

For power supply units of EN54 series, remote desktop window allows monitoring following parameters:

- voltage at AUX1 and AUX2 outputs and total current
- status and value of 230V mains supply
- voltage, battery level, temperature and internal resistance of battery, optional remote battery test
- status of technical outputs (EPS, PSU, APS, Alarm)
- status of input of collective failure EXTi
- status of controlled relay output EXT0
- status of TAMPER input

Additionally, it is possible to read history of events and in case of power supply units fitted with LCD display to read, history of parameters.

Buffer power supply units 13,8VDC switch mode, with technical outputs, IP65 hermetic enclosure PSBSH series

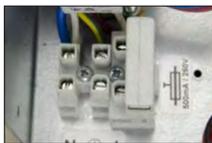

- power supply: 230VAC
- switch mode type
- IP65 hermetic enclosure, ABS
- technical outputs OC type:
 - EPS – 230V power failure AC
 - PSU – power supply failure
 - LoB – low battery voltage
- deep discharge battery protection (UVP)
- protections:
 - SCP short circuit protection
 - OLP overload protection
 - OHP overheat protection
 - surge protection
 - antisabotage protection
- warranty: 2 years from production date

- power supply outputs: 48VDC/0,5A – PoE/RJ45
52VDC/0,3A – PoE/RJ45
- power supply: 90÷264VAC
- compliance with IEEE 802.3 af standard *
- LED optical signalization
- protections:
 - SCP short circuit protection *
 - OLP overload protection
 - overvoltage protection (AC input)
- notes:
 - designed for 10Mb/s and 100Mb/s network

Straight-through – glass fuse (galvanic separation of each output)

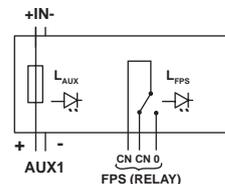

The diagram shows three physical views of the straight-through fuse modules and their internal circuit. The circuit includes individual input terminals (IN1, IN2, ..., IN...), a series of fuses (F1, F2, ..., F...), and load inductors (L1, L2, ..., L...). The outputs are labeled AUX1, AUX2, ..., AUX....

Panic alarm buttons

PN, PN-K series

AWZ700 – foot-operated panic button PN

- ALARM output: C/NC/NO – 1A@30VDC / 50VAC max
- TAMPER output: C/NC/NO – 1A@30VDC / 50VAC max
- operating conditions II environmental class, -10°C÷40°C
- enclosure: metallic DC01; 0,7mm, RAL 9003, IP20
- connectors: $\Phi 0,41 \div 1,63$ (AWG 26-14)
- warranty: 2 years from production date

AWZ710 – foot-operated panic button PN-K

- supply voltage: 11÷14VDC
- ALARM output: C/NC – 0,5A@30VDC / 50VAC max
- ALARM relay's operation mode (programmable function):
 - monostable (210s max.), bistable, latch
- TAMPER output: C/NC – 0,5A@30VDC / 50VAC max
- RST (RESET) input: controllable 0V (GND), time of impulse min 1s.
- optical indication LED
- operating conditions II environmental class, -10°C÷40°C
- metal enclosure DC01; 0,7mm, RAL 9003, IP20
- connectors: $\Phi 0,41 \div 1,63$ (AWG 26-14)

Enclosures for alarm control panels

Universal - two-level version

fitted with transformer of TRP series

Dedicated for control panels

DSC, SATEL, PARADOX, RISCO, PYRONIX, CROW...

Communication modules

GORKE - ATG; **ROPAM** - BASIC, MULTI GSM; **SATEL** - ETHM, GSM LT1, LT2, GPRS-T1/T2/T4

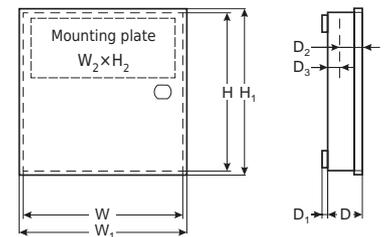

Two-level security metal enclosures for alarm control panels are designed for mounting motherboard of alarm control panel and input/output security and expansion modules, etc. First level is dedicated for installation of control panels, while second one for communication modules. In addition, installation of expansion modules is also possible. Enclosures are fitted with transformer of TRP series in PC / ABS plastic enclosure - IP30.

Enclosures for CCTV recorders horizontal

Enclosures protect recorder against unauthorized access or theft. Enclosures are made of 1mm thickness steel. They are equipped with lock and tamper switch, indicating enclosures opening. Due to vertical installation and low depth, they are ideal for places where enclosures of large dimensions, such as cabinets type RACK 19", cannot be installed.

After opening enclosures, an easy access to buttons on front panel of recorder is provided. Wiring in rear side of recorder can also be easily accessed. To do that, simply remove upper part of enclosure. They are possible to mount enclosures under tabletop using appropriate handles (available as accessory).

DIN/RACK metal enclosures

With DIN rails, mounting plates and RACK 19" profiles

Enclosures can be used as elements integrating installations of CCTV systems, Access Control Systems (ACS), Intrusion Detection Systems (IDS), LAN network, satellite TV, etc. In simplest model, it is possible to mount devices in DIN rail. Next model is fitted with hinged mounting plate for mounting electronic boards (control panels, access control panels). Top model is enhanced with RACK 19" profiles, which allow mounting of shallow devices with RACK 19" brackets.

Enclosures with cable frame

Enclosures are used in ICT and telecommunication sectors. They are designed to store excessive fiber optic cable. Enclosures are compliant with requirements of ZN96/TPSA-009 standard.

Enclosures consist of two parts - cover and frame. Cross-shaped frame allows storing excessive cable while maintaining safe bending radius. Possibility of coiling of up to 120 meters of fiber optic cable, depending on its diameter.

Cover protects cable against mechanical damage. Cover is mounted with single screw.

Enclosure for alarm control panel – vertical RACK 19"

RAW07 metal enclosure is designed for mounting alarm control panel and input/output modules in RACK 19" cabinets. This enclosure is fitted with removable mounting plate (level I) and removable hinged mounting plate (level II). Enclosure has place for single 7Ah / 12V battery. Mounting plate (level I) has pre-embossed openings for transformer of TOR / TRP / and TRZ series and built-in power supply units of PS / PSB / and PSBOC series by Pulsar. Hinged mounting plate (level II) has openings for control panels and expansion modules from following companies: DSC, PARADOX, RISCO, SATEL, PYRONIX, CROW, and ROGER.

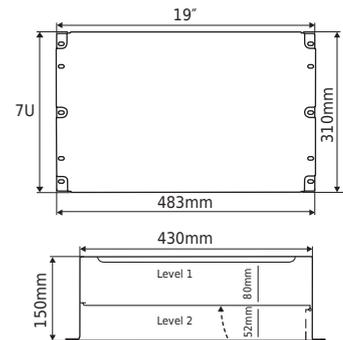

RACK 19"

RACK security enclosures are designed for mounting alarm control panel and input/output modules in free-standing RACK 19" cabinets with depths in range from 800 to 1000mm. They consist of two elements:

1. Patch panel is used to switch between YTDY 6x0.5 cable with copper cores and elastic cable supplying signals and power to control panel.
2. Pull out enclosure with 2U / 4U height – alarm control panel and input / output modules are mounted in this section – with space for 7Ah / 17Ah battery, transformer and ARAW45 fan (transformer and fan are not included).

Universal holes in enclosure allow mounting control panels and expansion modules of following companies: DSC, PARADOX, RISCO, SATEL, PYRONIX, CROW, ROGER.

RACK 19"

ARADIN1 - Voltage distribution panel is intended for mounting fuses, type: S in RACK 19" cabinet. One enclosure can accommodate max. 24 fuses, 1 S wide.

ARADIN2 / ARADIN3 - Enclosures with DIN rail for RACK cabinets are intended for mounting equipment located inside. Each enclosure has rail, length: 24x15. Height of module cannot exceed 160mm.

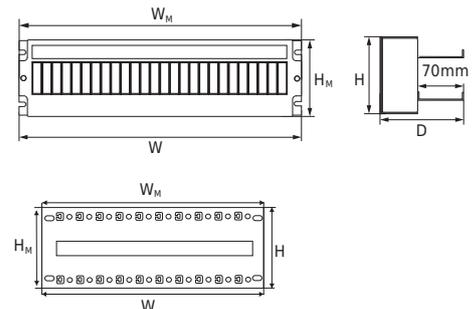

RADIN - Mounting plate of 4U high with DIN rail is designed for mounting devices on DIN rail in rear side of RACK 19" cabinets. Combination of rail with steel plate ensures rigid mounting of device on rail including possibility of attaching power cables / signal cables to mounting plate. RADIN offers economical alternative for enclosures ARADIN1, 2, 3 mounted in RACK 19" cabinets.

RACK 19"

ARADIN9 electrical switchboard is designed for installing S type fuses in RACK 19" cabinets. By default, terminal strip for neutral conductor N - 13x16mm² and PE grounding wire - 13x16mm² is located in upper part of electrical switchboard.

There are 36 fields with width of 1S (two rows of 18 fields). Each S field has description field and punched metal end cap.

In rear part of switchboard there are three shelves for safe and systematic installation of cables.

Other devices, including power supplies and switches outside S type enclosures, can also be installed in switchboard.

For this purpose, each DIN rail can be mounted in following locations:

1. Level 1 - rear part of enclosure - devices outside DIN enclosure
2. Level 2 - dedicated for S type fuses
