

## SPC Connect app - What's new?

Dear customer,

Acre's SPC Connect mobile app received a complete design overhaul to comply with acre's latest branding guidelines. In addition, we've implemented a whole bunch of new features. We hope our new branding and latest feature set will suit your needs.

**What's new in this release:**

- > **New feature:** App design follows the new acre corporate brand guidelines
  - New color theme and icons
- > **New feature:** quick actions
  - Mark frequently used operations as favorite to get easy access to them
- > **New feature:** Critical alert notification
  - Enable support for critical notification support while your smart mobile device is in "silence- or do not disturb mode". Receive urgent notifications from your intrusion detections system if an alarm or critical event occurs
- > **New feature:** FaceID/ fingerprint authentication
  - Add an additional layer of security, unlock the SPC Connect app via FaceID or Fingerprint
- > **New feature:** Day/Night mode
  - Change to either day or night mode or let the app follow the system settings
- > **New feature:** Search option within the panel list
  - Find a panel quicker in the panels list, search using text description or known panel ID to locate a panel from an extend list of panels
- > **New feature:** Mark panels as favorite
- > Marking a panel as favorite will automatically pin that Panel to the top of your Panels list.
- > **New feature:** Favorite areas
- > **New feature:** Info box after login
- > Receive current information on SPC Connect app and SPC Connect Cloud services such as update releases and schedule services.
- > **Improvement:** Map designer – lock elements and icons
  - Lock elements and icons onto the embedded maps to avoid accidental realignment or deletion
- > **Improvement:** New codebase to support platform development
- > **Improvement:** Enforce min password length
- > **Improvement:** Increase timeout for getting camera images
- > **Improvement:** consider user rights for areas and zone (multitenant system)
- > **Improvement:** GDPR option to delete account within mobile app
- > Small Bug Fixes
